

What Is Being Done?

Starting in the spring of 2007, MDOT will make improvements to the I-94/Baker Road interchange near Ann Arbor. The project includes:

- Widening Baker Road over I-94 to five lanes
- Construction of a new eastbound I-94 entrance ramp
- Reconstructing the existing westbound entrance and exit ramps
- Upgrading the existing eastbound ramp

When Will This Be Done?

The project is scheduled to be complete by the fall of 2007.

How Will Traffic Be Affected?

As part of the reconstruction of the I-94/Baker Road interchange, the project is being staged to minimize the impact on motorists as much as possible.

- Two lanes of traffic will be maintained in each direction on I-94 at all times during construction.
- One lane of traffic will be maintained in each direction on Baker Road.
- The Park and Ride carpool lot on Baker Road will be closed for a portion of the project.
- During reconstruction of the I-94 westbound entrance and exit ramps at Baker Road, the ramps will be closed for approximately 30 days. During the closure, the following detour will be in place:

- When the westbound entrance ramp is closed, traffic will be detoured using Baker Road, Jackson Road, Fletcher Road, and I-94.
- When the westbound exit ramp is closed, traffic will be detoured using Zeeb Road, Jackson Road, and Baker Road.
- During the reconstruction of the eastbound entrance ramp from Baker Road to I-94, the ramp will be closed for approximately 10 days. Traffic will be detoured using Baker Road, Jackson Road, Zeeb Road, and I-94.

Long-term Benefits

This \$7.5 million dollar project continues MDOT and the Granholm administration's commitment to providing Michigan with a safe, efficient and seamless transportation system that grows Michigan's economy, protects Michigan families, and improves the quality of life in every Michigan community.

How Will We Keep Motorists Informed?

For up-to-date information on this project, go to the MDOT Web site at www.michigan.gov/mdot, and select "Lane Closures" under "Quick Links." A searchable database is provided for all state road and bridge projects.
